TEXT:

HOGAN DUTCH DEAL: Amsterdam Rotterdam Bank NV has licensed the integrated banking **systems** of Hogan **Systems** Inc.

Hogan **Systems** (UK) Ltd., the British subsidiary of the Dallas-based software developer, signed the contract that...

...the next two years, including service fees. It is Hogan's first with a Dutch **financial** institution.

International Business Machines has exclusive marketing rights to Hogan software in the United States, Canada, and Puerto Rico but not elsewhere.

In a separate announcement, Hogan said it acquired **Systems** 4 Inc., Durango, Colo., for \$1.7 million.

Systems 4 provides integrated applications software to a clientele of 30 community banks. Its Exceed product line includes **systems** for customer information, deposits, loans, electronic **funds transfer**, and management reporting. They run on the IBM System/36 midrange computer.

SHADE CENTERLINE SYSTEM: Security Pacific Information **Systems** Inc., data processing subsidiary of Security Pacific Corp., has licensed the Centerline system of Michael Shade & Associates Inc., Sarasota, Fla., to service **financial** institution clients from its center in Denver.

Centerline, which runs on IBM mainframes, is an integrated retail banking system. It includes a customer information file, deposit system, and general **ledger**.

The announcement said it incorporates an interface to loans, trust, and other **systems**, resulting in their "logical" integration within Centerline.

EFT ON PCS: Supply Tech Inc. has introduced software to link banks and their customers via personal computers for electronic **funds** transfers.

Called STX12, the package sells for \$3,900. It runs on an IBM PC...

...a link to Dow Jones News/Retrieval Service for instant alerts and access to breaking **financial** news.

Others are listed corporate bond quotes, fundamental equity and bond data, and market statistics...

...calculate "passive income" under the 1986 tax reform legislation.

Called the Passive Investment Planner, the **menu** -drive template overlays Lotus 1-2-3 or compatible programs on IBM PCs and compatibles...

...is a year-old partnership whose first program - the Mortgage Portfolio Manager - is used by **accounting** firms, a few banks, attorneys, and individual investors. The firm is located at P.O...

Speeches and congressional testimony

Mar 1999

WORD COUNT: 18279

(USE FORMAT 7 OR 9 FOR FULLTEXT)

... Long-Term Capital Management, L.P. (LTCM) and issues associated with bank involvement with hedge **funds** . I commend you for holding this hearing to explore the reasons behind and the implications...

...be focused on bank supervisory issues presented by LTCM specifically and bank involvement in hedge **funds** in general.

While we are continuing to verify our understanding of the impact of LTCM...

...area. All banks should be revisiting the ways in which they extend credit to hedge **funds** . At this point, it appears that the lasting impact of LTCM will be the lessons...

...to ask the banks.

My statement is structured as follows: a brief description of hedge **funds** and their activities; a discussion of how national banks interacted with LTCM; a general characterization of national bank exposure to LTCM, specifically, and to other hedge **funds** ; a discussion of the Office of the Comptroller of the Currency's (OCC) supervisory strategies for bank lending to hedge **funds** ; and finally some preliminary observations about the lessons of the LTCM situation for banks, supervisors and **financial** markets.

Hedge **Funds** and Long-Term Capital Management, L.P.

The term "hedge fund" generally refers to unregulated...

...Therefore, the term "leveraged fund" is often used interchangeably with the term "hedge fund." Hedge **funds** generally are not subject to any reporting or disclosure requirements, and most hedge **funds** have the unrestricted ability to take short positions, which is not the case with mutual **funds** . Hedge **funds** use a greater variety of investment strategies and techniques than regulated **funds** . Hedge **funds** also can differ in structure depending on whether they are domiciled in the United States or based outside our geographic boundaries.

Most hedge **funds** are structured as limited partnerships. The partnership is run by the general partner(s) who is (are) usually an unregistered investment advisor. Hedge **funds** are not registered as investment companies nor subject to the standards implemented by the Investment...

...and does not presently propose to make a public offering of its securities...." Therefore, hedge **funds** structure themselves to avoid federal securities law regulation by limiting their securities sales to fewer...

...to fewer than 15 hedge fund "clients." Thus, generally, the limited partners (investors) in such **funds** are a limited number of wealthy, financially sophisticated parties, who must perform their own due...

...the hedge fund, since the fund is not subject to standardized disclosure requirements.

Although hedge **funds** deploy a wide variety of investment strategies, they are typically categorized as one of two types of **funds** -either macro **funds** or relative-value **funds** . Generally speaking, macro **funds** exercise some degree of leverage and execute cash market and derivative transactions to take large market direction positions in equities, fixed income and foreign exchange. Most of the new hedge **funds** are relative-value **funds** , which specialize in directional positions in specific markets, arbitrage strategies, or taking advantage of pricing inefficiencies in basic **financial** instruments in asset markets.

Long-Term Capital Management (LTCM)

LTCM was founded in March 1994...

...seeks to take advantage of small differences in the values of securities, currencies and other **financial** instruments within and between different markets. It generally relies heavily on quantitative analysis and computer...

...of in anticipation of their return to normal levels.

It has been reported in the **financial** press that some of LTCM's trading positions experienced losses as the expected convergence did...

...change in managerial control of LTCM and the infusion of capital.

National Banks and Hedge **Funds**

National banks can be involved with hedge **funds** in a number of ways, and with varying degrees of exposure. ...management services.

In addition, holding companies of national banks may be equity investors in hedge **funds** .3

National Bank Exposure to LTCM

The most recent information we have received from our...

...the exposures these banks typically had with other fund managers.

National Banks and Other Hedge **Funds**

National banks have exposures to hedge **funds** arising from direct lending, trading lines, and investments. As of earlier this week, eight national...

...billion, net of cash or Treasury collateral, from firms that are generally categorized as hedge **funds** . No bank's exposure exceeded 6.0 percent of its total risk-based capital.

OCC Supervision of Bank Relationships with Hedge **Funds**

The majority of national bank activities relating to hedge **funds** can be grouped under two main categories of bank operations: lending and capital markets activities. A bank may, for example, extend loans directly to hedge **funds** . A bank also may be an intermediary for hedge fund transactions through its trading department. Bank relationships with hedge **funds** mostly occur at the very largest institutions, which have full-time resident staff who monitor...

...expects national banks to analyze the credit risk of secured and unsecured lending to hedge **funds** consistent with the overarching principles of credit risk management established through its examination and supervisory...

...by detailed underwriting standards, guidelines, and procedures.

Loans and other lines of credit to hedge **funds** are reviewed by the OCC when commercial loans are examined, using loan portfolio management procedures...

...and strategic factors; internal controls; external factors such as economic trends; staffing; and management information **systems** .

The loan to LTCM is an example of slipping credit underwriting standards.that the OCCIn October 1993, the OCC issued Banking Circular 277 (BC 277), "Risk Management of **Financial** Derivatives," to establish safe and sound practices for managing **financial** risks, including those arising

from derivatives activities. BC 277 states that banks should adopt **systems** and controls to measure and monitor properly the individual and aggregate risks associated with their...

...derivatives activities, the OCC's procedures encompass the assessment of policies, procedures, practices; management information **systems**; effectiveness of the risk management process as well as the level of risk undertaken in...

...interim rescue of LTCM may provide some important lessons to banks, their regulators and the **financial** markets. First is the need not to lose sight of fundamental risk management practices. Credit...

...account in determining whether or not to make loans or engage in transactions with hedge **funds**.

Thus, the LTCM case underscores the need for banks to understand the full extent of their credit and trading exposure to leveraged customers, including hedge **funds**. As creditors, banks need to get as much information as possible about the fund's investment strategy and the exposure of other **financial** institutions to the fund. Although hedge fund managers may wish to limit available information on...

...receive insufficient information to make informed risk management decisions.

Where the transparency of hedge fund **financial** information is inadequate, the need for banks to secure and maintain sufficient collateral for their...

...risk management. One such principle teaches that if a lender lacks sufficient information about the **financial** condition and activities of a borrower or counterparty, the lender should obtain collateral to protect...

...a lender having collateral to protect its position in the event the borrower/counterparty's **financial** condition comes under stress.

Conclusion

In conclusion, although not all of the facts about the...

...the events surrounding the interim rescue of the firm certainly illustrate the continuing need for **financial** institutions and the regulatory agencies to assure adherence to prudent, effective risk management practices. Technological...

...in the footsteps of the distinguished statesmen and women who have shared their thoughts on **financial** and business issues with the Wallenberg Bankers Forum. A free market in goods and services...that are having the most difficult time of it happen to be those with banking **systems** that are troubled and bank supervisory standards that are undeveloped or inadequate. The lesson, I think, is clear: solid **financial** institutions-under effective supervisory controls-are the indispensable foundation of healthy, growing economies.

One of the biggest stories of the year in the U.S. **financial** system has been "mega-mergers" in the banking industry and that is what I would...

...day, Citicorp and the Travelers Group announced what would be nothing less than the biggest **financial** merger in U.S. history-indeed the biggest U.S. merger of any kind. In...

...very large banking organizations mean for competition and customer service in domestic markets? Consumers of **financial** services still have questions about how they will fare in the new banking regime. To...

...and reduced service in a less competitive domestic environment?

For some consumers, the existence of **financial** conglomerates raises

privacy concerns. Will cross-selling pressures between bank affiliates and subsidiaries-a major rationale for many of these mergers-compromise the confidentiality of customers' **financial** information? What certainty do consumers have that their bank will not share that sensitive information with unauthorized end users within the **financial** conglomerate?

Questions continue to come from many quarters about the consequences of a mega-bank...

...these questions were put to me when I testified before the Committee on Banking and **Financial** Services of the House of Representatives in April. What I tried to do then-and...This management drain is likely to have particularly adverse effects in critical areas like information **systems** -generally, one of the most challenging parts of the merger process. It is imperative, therefore...

...of expert staffing before the merger is announced.

Indeed, we have long known that information **systems** are often the weak link in any merger arrangement. Two separate **systems** must be consolidated to a common, Year 2000 compliant platform; two separate **systems** with limited capacity must somehow be integrated into one with far greater capacity. The combined...

...watched as the mega mergers announced this year move to consummation-and as the business, **systems**, and culture of the resulting organizations take shape. And we also know that we must maintain our supervisory vigilance to spot new emerging issues as new combinations occur in the **financial** industry.

Despite the pitfalls of consolidation and the questions that remain about whether the current...

...of mega-mergers will meet the expectations of their organizers, the future of U.S. **financial** services points toward more mergers. There is little doubt that the historical trend toward consolidation...

...expand their range of product and service offerings, to accommodate the needs of more sophisticated **financial** consumers.

And the types of combinations possible may soon expand significantly. Right at this moment...

...between banks, but among banks, insurance companies, and securities firms. I am referring to the **Financial** Services Competition Act of 1998, better known as H.R. 10. This legislation would eliminate...

...under the law in this country since 1933.

As we contemplate these new types of **financial** conglomerates, our experience in supervising large institutions has much to offer. That experience teaches us...

...the safety and soundness authority of bank regulators. It is especially true during the turbulent **financial** times through which we are presently passing-times that require the highest levels of supervisory...

...interim rescue of the hedge fund Long Term Capital Management, members of Congress admonished the **financial** regulatory agencies to be more vigorous to ensure that risks affecting any single institution are...this morning at another in the long series of successful conferences sponsored by the Federal **Financial** Institutions Examination Council. As important as they are, arranging these conferences is only one-albeit...
...s banking system-and our national economy.

These days-days of turmoil and anxiety in **financial** markets at home and abroad-one domestic banking issue looms above all others, and that...

...convey is not one likely to arouse great popular enthusiasm among our constituents in the **financial** community. Frankly, I was not seeking an

ovation from bankers when I announced in July...

...into bank loan portfolios to identify possible weaknesses and to evaluate banks' credit risk management **systems** and procedures. I was not campaigning to win any popularity contest among bankers by chastising...

...in the regulatory arena 10 years ago-as I was-remember all too well how **financial** institutions were brought to their knees through unwise lending, wishful thinking, inadequate controls, and imprudent...

...do everything within our power to ensure that, when and if that day arrives, our **financial** institutions will be there to do their important job in the best way they know...liquidity to U.S. capital markets and greater pressure to find profitable outlets for those **funds**. Although losses in overseas lending and trading activities have been much in the headlines of...

...recent wave of mergers and acquisitions has had relatively little noticeable effect on competition in **financial** services, which remains strong. Declining loan demand, which has been reported in some parts of...

...complex, computer-assisted arbitrage strategy known as convergence trading. Then, the sudden turmoil in international **financial** markets sent LTCM's assumptions about the movement of securities and currencies into a tailspin...

...maintaining sound underwriting standards and the sudden swiftness with which today's markets can penalize **financial** institutions that fail to protect themselves against excessive downside risk.

Indeed, most of the loans...trading exposure to leveraged customers of any size. If, for whatever reason, information about the **financial** condition and activities of a borrower or counter party is unavailable or impenetrable, the lender...

...over its competitors in identifying-and capitalizing on-temporary anomalies in the values of the **financial** instruments. Obviously, a point was reached when this turned out not to be enough.

Technology is a powerful tool in helping to understand and manage **financial** risk. The risk modeling techniques used by LTCM may have been oversold, but that does...

...not a substitute for-the sound judgment of bankers and basic techniques of risk management. **Financial** decision makers must understand how to interpret the output and limitations of quantitative models. The...

...a lender having collateral to protect its position in the event that the borrower's **financial** condition comes under stress. And, again, that applies to small banks as well as large...

...As I speak to you today, it appears that the seasons are changing in our **financial** world. But weak lending standards are never in season. The strength of our economy does...

...poorly underwritten loans are one of the best ways that I know of to weaken **financial** institutions and the communities that depend upon them.

A healthy banking system will ensure that...

...itself is in constant flux. Where it was once enough to match up against the **financial** institution across the street or across town, your customers' business today is up for grabs...

...in identifying and appealing to consumer tastes and preferences. While it is certainly true that **financial** products and services are priced and sold more like commodities than ever before, I firmly...

...convenience-no longer matter to consumers. In fact, as securitization and wider competition make the **financial** marketplace more uniform, it seems likely that those intangibles will become even more prominent on...

...pretext callers revealed the shocking ease with which they were able to pry loose personal **financial** information from overly-accommodating bank customer service personnel. Banks are themselves leading users and traders ...on their savings and investments. They want the opportunity to obtain ancillary banking products and **financial** products tailored to their specific needs and desires. And they recognize that, in order to deliver those products, **financial** institutions have a legitimate need for relevant information about their customers.

In short, consumers want...

...members of Congress, and the regulatory agencies-would be closely monitoring the extent to which **financial** institutions were actually embracing and implementing the industry's principles. Information developed by our working...

...opt out.

When I delivered my May privacy speech, I reported anecdotal evidence that some **financial** institutions were not in compliance with the letter or the spirit-or both-of the...

...basic human right, this directive imposes a high standard of protection for consumers dealing with **financial** and other firms in the nations of the EU. ...consumers specific legal remedies in case personal information is misused. And it expressly prohibits the **transfer** of personal data out of the EU to a third country unless that country ensures...

...the European standard.

The EU directive does make allowance for special contractual arrangements with individual **financial** institutions, arrangements that would allow them to continue doing business in the EU as long...

...in the EU, but could also have the effect of promoting higher privacy standards for **financial** institutions operating in the United States.

Just because EU policies are right for Europe does...

...it together in meeting the public's demand for convenience, safety, and privacy in their **financial** dealings. At the OCC, we have worked to advance the joint privacy interests of banks...

...And just last week, we convened a Privacy Forum, which brought together representatives of the **financial** services industry, consumer groups, and government staff to discuss many of the issues I have...

...to strengthen the legal framework for dealing with those whose actions undermine public confidence in **financial** privacy. Now awaiting the President's signature is the Identity Theft and Assumption Deterrence Act ...

...will help us to arrest what is today one of the fastest growing types of **financial** fraud. Not enacted by Congress but hopefully ripe for passage in the next Congress is a bill, the **Financial** Information Privacy Act, that would establish sanctions for unscrupulous information brokers who "steal" confidential customer information from **financial** institutions through techniques such as pretext calling.

Yet, although regulators and lawmakers have important roles to play in safeguarding the confidentiality of consumer **financial** information, the primary burden rests with you who have the most to gain from it...

...metropolitan area has had direct experience with one of the most significant developments in the **financial** services industry in recent

years-the trend toward consolidations and mergers, and, this year, the **financial** services to small business and entrepreneurs? And, second, where do these megamergers leave **financial** institutions that are less than megasized, notably our community banks?

Mega-mergers have in fact...

...a host of concerns, foremost among them being that the price, quality, and availability of **financial** services will suffer in their wake. In some major markets, critics argue, big mergers will bring diminished competition among **financial** providers, which cannot be good for the average consumer. Others warn about a decline in...

...ear and an indifferent eye to their needs and choose to concentrate their vast new **financial** clout on wealthier clients and the prospect of bigger returns.

These concerns are especially meaningful for small businesses, given their traditional reliance on commercial banks for their credit and other **financial** needs. One recent survey showed that 87 percent of all small business owners had some...

...lion's share of small business checking accounts, and perform a wide variety of crucial **financial** functions-safekeeping valuables, managing cash, keeping the books, issuing letters of credit, converting foreign currencies, and innumerable other **financial** and fiduciary services-for firms that lack the size and resources to do these things...

...calamity if banks were no longer able or inclined to play their traditional role of **financial** provider to the small business community. Yet, I feel confident in saying that this scenario...

...foresee a future in which small business enjoys even greater access to bank credit and **financial** services than ever before. Let me take a few minutes to explain why.

First, it...

...short, recent history gives us no reason to assume that small business credit and other **financial** services will inevitably dry up as a result of the consolidation in banking. Instead, the...

...to conduct all of their banking business with their primary lender and to purchase ancillary **financial** products and services where they bank. Moreover, despite the relatively high failure rates of small...

...computer model, which establishes a maximum loan amount and interest rate. No business plan or **financial** data is needed. Interestingly, that same bank is in the process of merging with another...for real estate, education, automobile, and other types of loans is one of the real **financial** success stories of our times. It has helped millions of Americans achieve their goals of...

...of credit and other banking services to small businesses. Mega-mergers will indeed alter the **financial** services landscape, but the evidence clearly shows that the small business loan market is currently alive and well, with many **financial** institutions, bank and nonbank, vying to make good small business loans and provide the additional **financial** services that entrepreneurs need to build their businesses.

I have heard it suggested that, as...

...the survivors continue to compete amongst themselves.

But I believe that the structure of our **financial** system, with its mix of large and small institutions, does matter. Structure and strength go...

...business people want what community banks have to offer: the personal

touch, a broad service **menu** , and local management. And that is why community banks are able to maintain their important position in our fiercely competitive **financial** world. Community bankers pound the pavement in search of new customers and visit existing customers...

...conclude that community banks will continue to play a vital role in our nation's **financial** future. Today, two-thirds of all banks in the United States have less than \$100...

...That is why, despite the wave of mega-mergers, average local market concentration in the **financial** services sector is about the same today as it was 10 years ago. That means that small businesses can count on a sure, steady supply of high quality **financial** products and services today and into the future.

At the Office of the Comptroller of the Currency, our commitment to improving access to **financial** services for all Americans-including those who own and operate small businesses-takes many forms...

...how, under enlightened law and regulation, mega-mergers can increase the availability of financing and **financial** services to entrepreneurs. And we have recently announced that we intend to survey our largest...free market, I believe that we can safeguard access to-and the adequacy of-the **financial** resources that the small business community must have in order to do what you do...

...to play a vital role in supplying small business and other forms of credit and **financial** services. The dynamism of the small business sector is a big reason why we have...

...Comptroller of the Currency, before the Exchequer Club, on customer service and competition in the **financial** services industry, Washington, D.C., November 18, 1998

Good afternoon. It is a privilege to...

...speak at all on this issue is a reflection of the changed and increasingly competitive **financial** services environment in which banks operate. Customer service is a key competitive intangible-a factor that will profoundly affect the future of competition in **financial** services. It requires providers to deliver the mix of products and services that customers need...

...on the job to the last. Examiners of his generation counted the cash, balanced the **ledgers** , verified the bonds, reconciled correspondent accounts, and pretty much left it at that.

Things could...

...to a significant degree on the larger environment-social as well as economic-in which **financial** institutions operate. Although some of these environmental factors may lie entirely or partially beyond the...

...and abroad. This offers a broader, more comprehensive view of the sources of risk in **financial** institutions.

Some of the nine risk factors we now consider in our supervisory activities-credit...earnings and capital arising from negative public opinion that may expose the institution to litigation, **financial** loss, or a decline in its customer base. Reputation risk requires bankers to exercise an...

...regulatory relief, two measures much desired by the industry as a whole, failed to pass. **Financial** modernization legislation would have combined measures liberalizing affiliations between banks and securities and insurance firms...

...the 105th Congress disappointed.

This legislative parsimony did not seem to affect other types of **financial** institutions. Some-most-fared better than banks. Perhaps bankers were less adroit or less unified...

...benchmark of customer satisfaction-both in absolute terms and in comparison to customers of other **financial** providers, including credit unions and savings institutions.

Nothing seems more responsible for bankers' poor showing...

...reasonable and equitable charges for services rendered. And, given today's vigorous competition in the **financial** services market, consumers who are unhappy with their bank can usually shop around in search... building customer relationships based on trust that will endure over time and serve customers' evolving **financial** needs over the course of their lives.

This is critical to the long-term successful...

...the dominance that banks have long enjoyed. Already, computer software companies are positioning themselves as **financial** intermediaries, where their experience in making technology user-friendly should stand them in excellent stead...

...America-and our banking system-is the envy of the world.

Today's challenges in **financial** services are different. Today, to put it mildly, there is no shortage of viable **financial** institutions, as there was in Lincoln's time. But today, a **financial** institution's future in a highly competitive marketplace depends upon the degree to which it...

...concerns on issues such as privacy.

Those are the diverse challenges that will separate the **financial** services winners from those that lag behind in the new millennium. At the OCC, our...we are now able to take a more top-down approach, taking into account the **financial** condition and future prospects of the FBO's parent company, along with the strength of...

...program are 1) the supervisory regime of the home country; 2) the home country's **accounting** standards; and 3) the condition of the home country's **financial** markets. Another facet of the program is an attempt to evaluate the combined operations of...

...FBOs. We identify the quantity of risk, along with the quality of the risk management **systems** - the tools used to manage the risks.

The four aspects of an effective risk management...

...to focus on how a bank manages risk and the quality of its risk management **systems** from a firm-wide or global perspective.

Similarly, as I mentioned earlier, under the FBO...

...regularly, are integral and critical elements in our assessment of the organization's risk management **systems**. To make ...s head office to obtain, firsthand, a better understanding of the policies, practices, and risk **systems** of the bank. This examiner's perspective allows us to tailor our supervision into individual...

...evaluate the management of these risks within the context of the parent's risk management **systems** and local risk management practices. As I mentioned, that is why the home country and...

...bank's head office to obtain a better understanding of the policies, practices and risk **systems** of the consolidated bank. The portfolio manager concept adds significant strength to our supervisory process...be "plain vanilla," that is, traditional and uncontroversial subsidiary activities generally of a banking or **financial** nature. I would like ... branches and agencies.
